Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-24, 26-30 and 59-62 are rejected under 35 U.S.C. 102(b) as being anticipated by Newhouse (5,997,080). Newhouse discloses the use of a seat portion (10) including a base (28) having a seating surface; and a object holder (12), wherein the object holder includes a receptacle for receiving objects (14); wherein the object holder is moveable to a storage position (fig. 2); and wherein the receptacle is partially under the seating surface in the storage position. In regards to claims 22,29 and 60, the object holder is pivotally (fig. 4) attached to the base. In regards to claims 23 and 61, the object holder includes an extension (24) slidably connected to the base and positioned under the seating surface. In regards to claims 24 and 62, the extension includes a slot (25), and the base includes a post (22) positioned in the slot to limit a sliding potion of the object holder. In regards to claims 26 and 28, the object holder is configured so that when the object holder is moved under the seating surface a portion of the object holder remains accessible, thereby providing a gripping surface (34). In regards to claim 27, a seating surface on a base, a object holder; wherein the object holder is attached to an extension slidably connected to the base and positioned under

the seating surface; and wherein the object holder is adapted to be partially retracted under the seating surface in a storage position. In regards to claim 30, the base includes a post (22) positioned in a slot (24) in the object holder. In regards to claim 59, further comprising a seating surface on the base; and an object holder movably attached to the base to move between an extended, in use position and a retracted storage position; wherein when the object holder is in the retracted, storage position, a first portion of the holder extends beyond the outer surface of the base and a second portion of the object holder does not extend beyond the outer surface of the base, figures 1 and 4.

Claims 21-22,25-26,28-29,59-60 and 63 are rejected under 35 U.S.C. 102(b) as being anticipated by Shafer (5,358,307). Shafer discloses the use of a seat portion (10) including a base (21) having a seating surface; and a object holder (60), wherein the object holder includes a receptacle for receiving objects (66); wherein the object holder is moveable to a storage position (fig. 4); and wherein the receptacle (61) is partially under the seating surface in the storage position. In regards to claims 22,29 and 60, the object holder is pivotally (fig. 5) attached to the base. In regards to claims 25 and 63, a second object holder (30) attached to the base. In regards to claims 26 and 28, the object holder is configured so that when the object holder is moved under the seating surface a portion of the object holder remains accessible, thereby providing a gripping surface (64). In regards to claim 59, further comprising a seating surface on the base; and an object holder movably attached to the base to move between an extended, in use position and a retracted storage position; wherein when the object holder is in the

retracted, storage position, a first portion of the holder extends beyond the outer surface of the base and a second portion of the object holder does not extend beyond the outer surface of the base, figures 4-5.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to child seat: U.S Pat. No. US005520436A, US005586804A, US006145931A, 4883317, US005967602A, US006390547B1, US006520575B1, US005195711A, US005248183A.
